Metocene MF650W

Technical Data Sheet

Metocene MF650W is a very high melt flow rate homopolymer resin with very narrow molecular weight distribution. It is suitable for melt blown fibers as well as compounding extrusion applications. This material is available as a free-flowing, low dust granule (flake) resin. This product contains no peroxide or peroxide decomposition by-products. It is a low gas fading product.

The very narrow molecular weight distribution and high degree of resin consistency promote finer fibers, enhanced fiber filament thread line continuity as well as reduced fly and lint in melt blown spinning processes. Its very high melt flow rate allows reduced processing temperatures and energy savings. This is a low smoke, clean running resin with good thermal and processing stability.

Regulatory Status

For regulatory compliance information, see Metocene MF650W Product Stewardship Bulletin (PSB) and Safety Data Sheet (SDS).

Status

Commercial: Active

Availability

Asia-Pacific; Europe; North America

Application

Absorption & Filtration; Colour Concentrates; Nonwovens; Wipes/Tissues

Market

Compounding; Textile

Processing Method

Compounding; Melt Blown

Attribute

Extremely High Flow; High Purity; Low Smoke Emission; Narrow Molecular Weight Distribution

Typical Properties
