Technical Data Sheet

Alathon H5112

High Density Polyethylene

Product Description

Alathon H5112 is a medium-molecular-weight-distribution resin with balanced impact/ESCR and high flow characteristics. Typical applications include housewares, food containers, pail handles and toys.

Regulatory Status

For regulatory compliance information, see Alathon H5112 Product Stewardship Bulletin (PSB) and Safety Data Sheet (SDS).

Status

Commercial: Active

Availability

North America

Application

Caps & Closures; Containers; Housewares; Sports, Leisure & Toys

Market

Rigid Packaging

Processing Method

Injection Molding

Typical Properties

Notes

Conditions of Tensile Stress and Elongation values are: 50 mm/min, Type IV specimen.

Conditions of Flexural Modulus values are: 0.5 inches/min or 12.5 mm/min.

Conditions of Tensile Modulus values are: 50 mm/min, Type I Specimen.

Spiral Flow measures the number of inches of flow produced when molten resin is injected into a long, spiral channel (0.0625" insert), at a constant injection pressure of 1000 psi with a melt temperature of 440 °F.

Deflection Temperature Under Load and Low Temperature Brittleness data are for control and development work and are not intended for use in design or predicting performance at elevated or sub-ambient temperatures. These are typical property values not to be construed as specification limits.

Processing Techniques

Specific recommendations for resin type and processing conditions can only be made when the end use, required properties and fabrication equipment are known.
