Adstif HA612M is a high crystallinity medium fluidity polypropylene homopolymer. It does not contain slip or anti-blocking additives and it does not contain Calcium Stearate.

Adstif HA612M is typically used by customers for cast film applications where high rigidity and high temperature resistance are required. Adstif HA612M is used by customers for the production of coextruded twist wrapping, labels, lamination, metallize able film and textile packaging.

Films produced with Adstif HA612M have been reported by customers to exhibit very high stiffness.

**Regulatory Status**

For regulatory compliance information, see Adstif HA612M Product Stewardship Bulletin (PSB) and Safety Data Sheet (SDS).

#### Mechanical Properties

- **Flexural Modulus**: 1900 MPa (ISO 178)
- **Tensile Stress at Break**: 23 MPa (ISO 527-1, -2)
- **Tensile Stress at Yield**: 37 MPa (ISO 527-1, -2)
- **Tensile Strain at Break**: 100 % (ISO 527-1, -2)
- **Tensile Strain at Yield**: 8 % (ISO 527-1, -2)

#### Thermal Properties

- **Vicat Softening Temperature, (A/50 N)**: 160 °C (ISO 306)
- **Heat Deflection Temperature B, (0.45 MPa, Unannealed)**: 110 °C (ISO 75B-1, -2)
Notes
These are typical property values not to be construed as specification limits.

Processing Techniques
Users should determine the conditions necessary to obtain optimum product properties and suitability of the product for the intended application.
