**Product Description**

*Ultrathene* UE635000 is an ethylene vinyl acetate copolymer selected by customers for extrusion coatings on cellophane, polypropylene and polyester. UE635000 is also selected by customers for use in special coextruded substrate coating applications, yielding improved heat stability for snack food packaging.

**Regulatory Status**

For regulatory compliance information, see *Ultrathene* UE635000 Product Stewardship Bulletin (PSB) and Safety Data Sheet (SDS).

### Status

- **Commercial**

### Availability

- **North America**

### Application

- **Sealants; Wire & Cable**

### Market

- **Flexible Packaging; Wire & Cable**

### Processing Method

- **Blown Film; Cast Film; Extrusion Coating; Wire & Cable**

Notes
The equivalent melt index figure is correlated from Melt Flow Rates obtained with ASTM D1238.
These are typical property values not to be construed as specification limits.

Processing Techniques
The maximum recommended melt temperature for Ultrathene UE635000 is 450 °F (232 °C).
Specific recommendations for resin type and processing conditions can only be made when the end use, required properties and fabrication equipment are known.
