Product Description

*Alathon* L5008HP is a bimodal, high molecular weight, high density polyethylene resin with excellent processing characteristics. L5008HP is selected by customers for pressure pipe applications including industrial piping, mining, oil & gas gathering, municipal water service lines and sewers. When combined with an approved color or black masterbatch at the correct use level, L5008HP may meet the following standards or requirements (see Technical Data Sheet for limitations and more information):

- ASTM D3350 Cell Classifications: PE445574C CC1, PE445574E CC0
- NSF Standard 14 and Standard 61 for Potable Water Pipe and Fittings
- NSF Standard 358-1 for PE Pipe and Fittings for "Geothermal" Heat Pump Systems
- Plastics Pipe Institute (PPI) PE 4710 per PPI TR-3

Regulatory Status

For regulatory compliance information, see *Alathon* L5008HP Product Stewardship Bulletin (PSB) and Safety Data Sheet (SDS).

### Status
Commercial

### Availability
North America

### Application
Drinking Water Pipe

### Market
Industrial, Building & Construction; Pipe

### Processing Method
Pipe

Notes

Typical Property values were determined on natural L5800HP resin, unless otherwise noted. Conformance Test values were determined from L5800HP compounded with an approved masterbatch.

These are typical property values not to be construed as specification limits.

Processing Techniques

Specific recommendations for resin type and processing conditions can only be made when the end use, required properties and fabrication equipment are known.

Approved Black Masterbatches

The following black masterbatches are approved for use with Alathon L5008HP when added to produce a carbon black level in the final article of 2.00 - 2.56 wt%. When using a nominal 35 wt% carbon black masterbatch, this will result in a use level of the masterbatch between 6.0 and 7.3 wt%. Addition levels may need to be adjusted due to variation in the certified carbon black level in the particular masterbatch lot.

Chlorine Classification

Alathon L5008HP meets the ASTM D3350-14 chlorine classification value of CC1 when combined into pipe with PolyOne B60054 at a final carbon black level of 2.00-2.56 wt%.

Caution

If an approved masterbatch is not used in the manufacture of pipe or fittings, the customer assumes all responsibility for determining that the final article meets the applicable material and pipe or fittings standards.

Certifications

Certified as meeting requirements of Plastics Pipe Institute and NSF International, as stated above.
